

Annika Jungfleisch

UX/UI Designer | Product Design | Design Systems

annika.jungfleisch01@gmail.com | +353 83 137 3379 | [linkedin.com/in/annika-jungfleisch](https://www.linkedin.com/in/annika-jungfleisch) | annika.ie

Summary

Interaction Designer delivering end-to-end, user-centred design work across user research, wireframing, high-fidelity Figma prototyping, usability testing, and production-ready developer handoff. Works within Agile, cross-functional teams to translate ambiguous requirements into accessible, responsive interfaces for web and mobile. Builds and applies design systems to keep delivery consistent at scale, and partners closely with engineers to keep designs implementation-ready. Communicates design rationale clearly to both technical and business stakeholders, backed by front-end coding experience and the adaptability to bring AI tools into the workflow where they speed up research and repetitive tasks.

Skills

UX/UI Design: End-to-end Product Design, User-Centred Design, User Research (interviews, card sorting, tree testing), Wireframing, Usability Testing, High-Fidelity Prototyping, User Flows, Information Architecture, Responsive Design (Web, Mobile, Desktop), Design Systems, Accessibility (WCAG 2.1)

Visual Design: Typography, Colour Theory, Visual Hierarchy, Iconography, Brand Guidelines, Layout

Software: Figma (variables, tokens, components, auto-layout, Dev Mode, AI features), FigJam, Miro, Adobe InDesign, Affinity Studio, Lyssna, Mural, Power BI, Qualtrics

Front-End & Collaboration: HTML, CSS, JavaScript (DOM manipulation, JSON, event handling), Bootstrap, Git & GitHub (version control, GitHub Pages), Design-to-Development Handoff, Component Annotation

Transferable: Stakeholder Management, Cross-Functional Collaboration, Design Reviews, Communication, Problem-Solving, Critical Thinking, Adaptability, Giving and Receiving Feedback

Experience

Interaction Designer (Part-time) | University of Limerick

Jan 2026 - May 2026

- Eliminated post-handoff revision requests from a cross-functional engineering team by wireframing and delivering a 60-screen, WCAG-compliant Figma prototype with complex interaction states, responsive layouts across mobile and web, and complete component annotation.
- Achieved a 93.7% average task success rate in tree testing (9 tasks, 7 participants) to validate the site's information architecture, then led a 4-person design team through 3 iterative prototype cycles of user research, design system application, and production-ready architecture development.
- Secured full stakeholder sign-off across 3 structured design reviews with academic and industry stakeholders by communicating accessibility-focused design rationale to a 4-person cross-functional team, resolving 3 flagged low-directness navigation paths identified through tree testing before final handoff.

Design Intern (Full-time) | UL Careers Service, University of Limerick

Jun 2024 - Jan 2025

- Produced 50+ brand-compliant digital, print, and DOOH assets in Adobe InDesign, maintaining visual identity and typographic consistency for 200+ enterprise employers and 3,000+ students across large-scale careers events.
- Increased newsletter engagement across a 20,000+ student audience by iterating Mailchimp campaign designs, using Power BI engagement data and Qualtrics user feedback to inform each publication cycle.
- Resolved 4 accessibility issues found consistently across legacy print designs by redesigning assets to meet WCAG 2.1 standards during each publication cycle.
- Led a week-long handover and knowledge-transfer period for the incoming intern, communicating ongoing design priorities and documentation to ensure continuity of work.

Team Lead (Volunteering) | Enactus UL

May 2024 - May 2025

- Grew society membership by approximately 34.8% by delivering a recruitment keynote to 350+ students and directing a promotional video that reached 1,000+ views on debut.
- Achieved a Top 20 UK & Ireland placement at the Enactus World Cup Qualifiers by directing a portfolio of social entrepreneurship projects across a 60-member team.
- Secured a EUR 2,500 PwC sponsorship and managed EUR 15,000+ in project funds, coordinating 60+ members across 900+ tracked volunteer hours.

Projects

Steve's Sheds - E-commerce Website Design

Jan - May 2026

- Designed a high-fidelity e-commerce prototype for a premium B2C client, progressing from wireframes through card sorting, tree testing, and 3 rounds of usability testing, iterating information architecture and CTA placement based on structured research findings.

- Built and documented a Design Master Template (colour palette, typography pairing, white space rules, UI conventions) as the shared design system reference for a 4-person team working to a fixed deadline.

Stack: Figma, Lyssna, UI/UX Design, Card Sorting, Tree Testing, Usability Testing, Information Architecture, Responsive Design (Mobile + Desktop), Design Systems, Accessibility (WCAG 2.1)

LitNest - Reading Tracking App

Jan - May 2024

- Led the full product design lifecycle from user research (interviews, competitor analysis, usability analysis) through low-fidelity wireframes to a 50-screen high-fidelity Figma prototype, personally designing 10 screens plus a full design system (tokens, component library, usage guidelines) across 3 user flows for social reading features.

Stack: Figma, Mural, UI/UX Design, User Research, Wireframing, Prototyping, Information Architecture, Design Systems

From Artefact to Interaction - Bachelor Thesis (Final Year Project)

Sept 2025 - May 2026

- Designed and built an end-to-end, open-source physical computing exhibit using Arduino and NFC, integrating hardware, software, and UX design, and conducted structured design reviews with academic and industry stakeholders, including the Hunt Museum, Limerick.
- Validated the exhibit through rigorous usability testing; the work was featured in university and local press, and the research abstract was published in the AICUR 2026 Book of Abstracts.

Stack: UX Research, Usability Testing, Information Architecture, Physical-Digital Interaction Design, Arduino, NFC, Physical Computing

Education

B.Sc. in Interaction Design | *University of Limerick, Ireland*

2022 - 2026

- QCA: 3.91 (First Class Honours) - Presidential Letters of Commendation for academic excellence.
- Elected Class Representative for four consecutive years.
